Office Action Summary

Application No.

10/705,310

Applicant(s)

OTTOFY, GLYN

Examiner

Aashish Karkhanis

Art Unit

3714

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 10 November 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

Claim Objections

1. Claim 4 is objected to because of the following informalities: Minor spelling errors such as "on" instead of "one" and "ord r" instead of "order," as well as the phrase "at least one of at least one of." Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4 – 7, 10 – 12 and 15 – 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Walker et al. (U.S. Patent 6,142,872).

Regarding Claims 1 and 11 – 12, Walker discloses a team gaming tournament method and apparatus including providing a computer network including a server including a memory for storing program instructions and data, a processor coupled to said memory for executing said program instructions, wherein said program instructions include program instructions and at least one end-user computer coupled to said server via a network connection (col. 6, lines 61 – 64), wherein said end-user computer has a graphical display portion adapted to display a browser window, displaying a game of a gaming tournament in said browser window (fig. 4, elem. 410; fig. 5, elem. 510; where a game window shows a browser with game information), permitting a plurality of users to enter said game of said gaming tournament, forming a plurality of teams of at least one

Art Unit: 3714

user from said plurality of users entered in said gaming tournament (col. 4, lins. 28 – 31), sending user input from said plurality of users to said server (col. 4, lins. 38 – 40; where a slot server can detect and process player input), calculating a placement finish for each of said plurality of teams in said gaming tournament in conformity with a predetermined formula having dependence on both a number of users on each of said plurality of teams and a performance of each said plurality of users (col. 6, lins. 12 – 34; where a placement finish is calculated by taking the greatest win score of a team of players of least loss score of a team of players and applying that score as the team result).

Regarding Claims 4 and 15, Walker discloses a method and program instructions including receiving an entrance fee from at least one of said plurality of players and said plurality of teams in order for each said plurality of teams to enter said gaming tournament and paying at least one of said plurality of teams and at least one of said plurality of players an award in conformity with at least one of a performance of each said plurality of teams and a performance of each said plurality of players, said award in conformity with a percentage of a total amount of said entrance fees received (col. 6, lins. 12 – 34; where an award of 100 coins is given, for example, when each player has entered 100 coins to buy into a game).

Regarding Claims 5 and 16, Walker discloses a method and program instructions including paying a predetermined amount of said percentage as an award to teams having at least two players and paying a predetermined amount of said percentage as

Art Unit: 3714

an award to teams having one player (col. 5, lins. 3 – 13; where payouts are different whether conventional single player or team gaming is played).

Regarding Claims 6 – 7 and 17 – 18, Walker discloses a method wherein said gaming tournament is a poker tournament, and includes at least one poker game of at least one of Texas Holdem, Seven Card Stud Hi, Seven Card Stud Hi/Low, Five Card Stud, Omaha Hi, and Omaha Hi/Low (col. 4, lins. 24 – 26; where a generic video poker game may inherently include many different popular types of poker games).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 8 – 9 and 19 – 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker.

Regarding Claims 8 – 9 and 19 – 20, Walker discloses a method and program instructions including a team play poker system, but does not disclose limiting a number of said plurality of players to enter said gaming tournament to a predetermined number, requiring each said plurality of teams to comprise a predetermined minimum number of players, and limiting each said plurality of teams to a predetermined maximum number of players. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to have modified the team game play poker device of Walker with

player scoring with player entry controls in order to create a more secure gaming environment for a casino.

4. Claims 2 – 3 and 13 – 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker in view of Marks et al. (U.S. Patent 5,755,621).

Regarding Claims 2 – 3 and 13 – 14, Walker discloses a method of and program instructions for placement finish including assigning a finish number to each said plurality of players (col. 6, lins. 12 – 20; where a finish number is a player game score). However, Walker does not disclose finishing numbers reflecting a win/loss order, or equalization numbers. However, Marks teaches said finish number being equivalent to an order that each said plurality of players is eliminated from said tournament relative to other said plurality of players, assigning a finish equalization number to each said plurality of teams, said finish equalization number being equivalent to a maximum number of players allowed per each said plurality of teams divided by an actual number of players per each said plurality of teams (col. 20, lins. 15 – 22; where each player is ranked based on the outcome of the current round of the tournament), assigning an equalization number to each said plurality of players, said equalization number being equivalent to a multiplication of said finish number of each said plurality of players of a team and said finish equalization number of said team, calculating a team placement finish, wherein each said plurality of teams having a placement finish equivalent to a sum of said equalization number for each of said plurality of players of each said plurality of teams wherein a higher number corresponds to a higher team placement finish, and assigning said finish number only to each said plurality of players finishing in

Art Unit: 3714

a predetermined number of places in said gaming tournament (col. 20, lins. 15 – 22; where player rankings for players that have not been eliminated in each round of the tournament are constantly updated with the player's relative ranking in a smaller group of competitors, for example, player may be ranked out of 30 for an early round, but only out of 10 for a later round).

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to have modified the team game play poker device of Walker with player scoring with the poker tournament game system with player ranking of Marks in order to increase excitement and competition among players, as well as extend the multiplayer and group play beyond teams into a competitive setting.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent 5,897,436: Network team poker game.

U.S. Patent 6,206,782 B1: Team casino gaming.
